PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY 25X1D
 25X1D 25X1D

This military barracks installation located on the east side of Gaysin (48-48N 029-24E) occupies approximately 200 acres (Figures 1 and 2). The barracks/administrative area contains 10 single-story and five multistory barracks, 15 quarters buildings, and two multistory administrative buildings. The general storage area contains seven possible storage buildings and the equipment storage/maintenance area contains nine probable maintenance buildings and six probable storage buildings. The driver training area contains two figure "8's" and one circular course. Circumscribing these is a "driving road," generally hexagonal in shape. Access

to the installation is via a two-lane crushed rock/gravel road. Gaysin lies in an area which appears to be totally agricultural.

This installation is covered by six KEYHOLE missions between [REDACTED]

[REDACTED] 15 quarters buildings were erected at the south end of the Administrative and Troop Housing Area. From [REDACTED] no significant changes are apparent and no activity is apparent in the snow covered area of the driver training course in [REDACTED]

25X1D 25X1D 25X1D 25X1D

DESCRIPTION OF INSTALLATION

Railroad Service

The nearest rail line to the installation extends generally from the southeast to the northwest and passes tangent to the southwest end of Gaysin.

Road Service

The main road leading to Gaysin from Uman (38 miles east) to the southeast is probably a two-lane road of water-bound crushed rock and gravel. All other roads in and around town appear to be single lane and of dirt construction.

Administrative and Troop Housing Area

Area D (Figure 3) has 10 single-story barracks, five multistory barracks, two multistory administrative buildings, six probable vehicle storage sheds, 15 quarters buildings, three probable storage buildings and fifteen unidentified buildings.

General Storage Area

Area E has seven possible storage buildings. These appear to be isolated from the other building groups. They are located near the driver training areas.

Equipment Storage/Maintenance Area

Area J has nine probable maintenance buildings ranging from 25 by 45 feet to 60 by 80 feet and six probable storage buildings ranging from 30 by 140 feet to 35 by 175 feet.

Athletic Fields

Area D has three athletic fields and one possible volleyball court.

Driver Training Area

Area M is roughly hexagonal in shape and is surrounded by a driving road. The area, which appears to be precisely laid out and well kept, contains two figure "8" courses and one circular course, probably for wheeled vehicles.
